YELLOW LUTEA HYBRID. SOUV. DE MAXIME CORNU

# M. JAN 7 1944

# TREE PEONIES for Your Garden

When you plant Tree Peonies you are planting for effects of permanent beauty. Well-grown specimens increase in size and loveliness with the years. No flower in our modern gardens has more rich historical associations and romantic traditions than has the Tree Peony. Use them in the background of your perennial garden, or find a place for them in the foreground of your shrub planting. Tree Peonies make attractive specimen plants.

Our Tree Peonies are greatly cherished by gardeners because we offer the largest, strongest, and sturdiest of plants.

A Tree Peony will make a delightful gift to some garden-loving friend.

## PEONIES

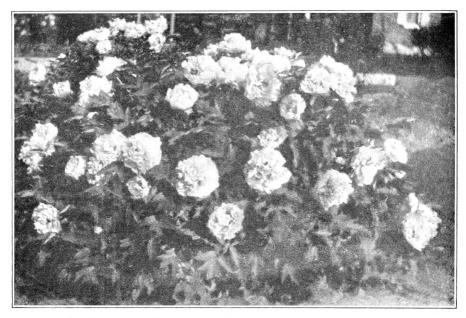

#### OBERLIN PEONY GARDENS

R. L. OBERLIN

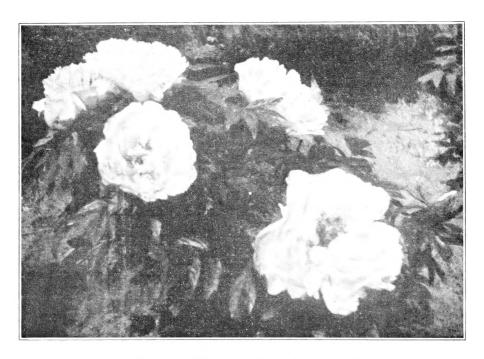

425 Penn Avenue

SINKING SPRING BERKS PENNA.

5 Miles West of Reading on Route 422

PAEONIA ARBOREA (Tree Peony) BANKSI, 10 years old, on its own roots, 4 feet high, 15 feet in circumference, bore 125 double, flesh-pink flowers in 1929.—Oberlin Peony Gardens, Sinking Spring, Pa.

A PURE WHITE TREE PEONY

#### Introduction

In presenting the Peony, the Queen of Flowers, we wish to say to the reader, by way of introduction, that Sinking Spring, Pa., with its surrounding territory, is famous for its Peonies. The soil and climate are well adapted to the growth of this beautiful flower, which in delicacy of tint and fragrance surpasses all other flowers. If you are a lover of flowers, you are making a wise choice in selecting Peonies to grow, as they are the most satisfactory, being the easiest to raise of any and all flowers for this country, particularly the North. They are the most hardy, the most showy, the most dependable, the most reliable, the most wonderful flowers, and we might say the only flower you can't kill with neglect. The peony is a native of China and was a source of inspiration for painters and poets during the Golden era. Even today the conventionalized peony is much seen in Chinese art. Peonies are generally divided into two classes; (1) Herbaceous, the tops of which die down to the ground each fall and start new growth from the roots in spring and (2) Tree Peonies, which are woody and do not die down; but, start growth from the eyes which were formed on the branches the preceding summer.

In general, we may say that the herbaceous peony is very hardy, having been known to withstand cold as low as forty degrees below zero, Fahrenheit. This type of peony is perennial and under favorable conditions will bloom for a generation or more. The Herbaceous is comprised of the following types: Early May-flowering (species and hybrids), Chinensis, Japanese and Single.

**Eight Weeks of Peony Blooms.** We have these beautiful flowers with us for nearly two months. You may share our enjoyment with us for the same length of time by consulting this catalog and planting the varieties as they are classified, from the earliest to the very latest bloomers.

**Time to Plant.** The best time to plant both Tree and Herbaceous Peonies is in the autumn, beginning about September 1, although the early May-flowering section can be planted as early as August 15, and the planting of the roots can be continued until the ground freezes. To prevent heaving of the roots by frost, they should be covered with a mulch of leaves or straw manure the first season. Peonies can also be planted successfully in spring if this is done early, as soon as the frost is out and the soil is dry enough. If planted in the spring, water frequently during the summer.

Our Roots. Our roots have been tested on our grounds, and every one is true to name. If you wish to adorn your lawn or garden with true stock, correctly labeled, do not overlook this list. As to size, quality, and strength of our roots, they rank with the best on the market, and will usually bloom the first year. However we do not guarantee results, as we have no control over stock after leaving our hands. Do not be too hasty in judging the plants the first season, as all plants receive a shock when transplanted and should have a season's growth to become established.

Full Cultural Directions Included With Every Shipment.

#### TREE PEONIES

#### (PAEONIA ARBOREA)

This species, a shrub in character, is one of the first to bloom in the early spring, followed immediately by the Herbaceous; early Mayflowering, Japanese, Single and Chinensis.

The tree peony is native to the mountains of China and from there was imported into Japan. Thence, in about 1800, it was brought to Europe where, after a good deal of hybridizing, the present European tree peony was evolved. The Japanese themselves continued to hybridize on the tree peony and about the turn of the century began to import these peonies into the United States. These were therefore known as Japanese tree peonies.

The shrub starts to produce an increasing number of sprouts from below, and in this natural way it continues to live and prolong its life, at the same time enlarging the clump. Therefore, in pruning, no living wood should be cut, but only the part of the shrub that has been winter-killed should be removed.

It will require a season's growth for it to become thoroughly established and show the perfection of its bloom. Double varieties will sometimes bloom single and semi-double until thoroughly established. The flowers are larger than those of the Herbaceous varieties, with a crepe-paper-like texture and ruffled and crimped on the edges of the petals. A well-established, mature bush is truly a gorgeous sight when in full bloom, growing 3 to 4 feet in height and spread and bearing 25 to 100 blooms.

No garden should be without several tree peonies. They make a very nice specimen plant and are a joy to behold. There are records that one plant had as many as 400 blooms on it. If properly located, cultivated and fertilized a tree peony will grow and bloom satisfactorily for many years.

Until the outbreak of the present World War we imported the better varieties of peonies from Europe and Asia and kept only the hardiest and best bloomers for listing in our catalog. At the present time we are entirely independent of any foreign source of supply due to the fact that we are continually engaged in propagating our plants, of which we now have the largest selection in America. We are able to offer plants originated by Professor A. P. Saunders, probably the greatest living tree peony hybridizer, and we also have available plants originated by Morgan D. Reinbold, Esq., a local hybridizer to whom we extend all the facilities and courtesies of our nurseries.

South and east exposures, in open spaces and in full sunlight at least half of the day, are the best locations. If planted where they are exposed to north or west winter winds, they should have protection by mulching with dry leaves or a screen the first year.

We thank you, our customers, for your past patronage and trust that you will try some of our newer varieties. In case you have any questions about the proper care and cultivation of peonies, be sure to write to us and we will be glad to supply the information.

Each

#### TYPES OF TREE PEONIES

#### We Offer Three Different Types of Tree Peonies:

**Japanese:** This type produces large, broad-petaled flowers, the tips being crinkled with a crepe-paper-like texture and they have a central cushion of golden anthers which is typical of all Japanese Peonies. The foliage is cut finer and is narrower than European type.

**European**: This type produces large, double flowers similar to the double Herbaceous type. The foilage of these is broader than the Japanese type.

Yellow Lutea Hybrid: A new race of Tree Peonies has originated from the wild Tree Peony (P. lutea) crossed with other Moutan varieties. They all have characteristics of the parent Lutea, which is yellow. Their color is quite different from any of the other Tree Peonies, ranging from a pure yellow to a yellow and red combination which is most attractive. They are hardy but slow to propagate, hence very rare. Of the few varieties of these hybrids we have the following to offer under this classification at the present time. This group blooms about a week later than the Japanese and the European.

#### SIZES OF SHRUBS

The following prices are for strong 4 and 5-year-old shrubs that have already bloomed in our gardens. The size varies according to the variety, ranging in height from 12 to 24 inches, with several stems. We always send out the finest plants available in each particular variety. There is no comparison between these field-grown plants and the small pot-grown plants that are sometimes offered at a lower price. These pot-grown plants are usually 1 or 2 years old.

We are also in a position to supply very large specimens, bushy, well-developed clumps, 8 to 10 years old, of the varieties marked with an asterisk (\*) at \$12 each, excepting No. 70 Banksi at \$10 each, and No. 72 Bijou de Chusan at \$15 each.

-If interested in varieties not marked please write for prices.-

#### Japanese Tree Peonies

(English translation in parentheses)

1.	<b>Aboukin.</b> (Name of Old Palace). Large semi-double; clear crimson-red without a blue or magenta shade. Outstanding color. Rare	15.00
2.	Adzuma-Shibori. (Variegation of Adzuma). Large; double; fine scarlet with white splashes	10.00
3.	<b>Akashi Jishi.</b> (The Lion of Akashi). Enchanting clear pink, narrow waved petals protruding from the center	8.00

		Each
4.	Akatsuki-no-Yuki. (Snow at Dawn). Large; single; light flesh, changing to snowy white when fully opened	8.00
5.	<b>Anyα-no-Hikari.</b> (The light in the dark night). Brilliant blackish crimson; large double bloom	8,.00
*6.	<b>Beikoku.</b> (America). Large; semi-double; beautiful soft flesh-pink. Blooms very profusely on upright stems	5.00
7.	Chojyuraku. (Pleasure of longevity). Deep lilac-rose; double bloom	8.00
8.	${f Flora.}$ Beautiful transparent white. Single to semi-double	8.00
9.	Fuji-no-Akebono. (Dawn at Mt. Fuji). Large; double; creamy white, with faint lilac-purple at base. Extra fine	10.00
*10.	Fuji-no-mori. (The Woods of Mt. Fuji). Large; semi-double; beautiful orchid. Good grower, quickly attaining a height of 3 feet	5.00
	<b>Fuyoren.</b> (Name of song). Single; very rare color, lilac- purple, deeper at the tips of petals	8.00
12.	<b>Gessekai.</b> (Lunar world). Pure white, crinkled-petals. 12 to 15 inches in diameter. Strong grower, rare and beautiful. Best white	20.00
13.	<b>Gumpow.</b> (Flock of phoenix). Deep rosy carmine; fringed petals. Very fine type. Semi-double; very profuse	8.00
14.	<b>Gunpoden.</b> (Palace of grouping beauties). Large refined flowers of a very deep wisteria blue, very rare color	20.00
15.	<b>Hakubauriso.</b> (White Dragon). Large; semi-double; fragrant; pure white, with central cushion of golden anthers. Rare and beautiful	8.00
16.	<b>Hakuow.</b> (Whitish yellow). Sulphur yellow, with slight crimson at base, semi-double	10.00
17.	<b>Hanαkisoi.</b> (Contest of flowers). Deep cherry pink; waved petals; enormous size bloom. Exceptionally tall growth. Free bloomer; double	20.00
18.	<b>Hana-no-nishiki.</b> (Flower King). Large, double, cactus-formed blooms of light lilac-flesh, deeper at base	8.00
19.	Haru-no-Akebono. (Dawn of Spring). Large; double; white with crimson shade; irregular form with split petals	8.00
20.	<b>Hiryo-Nishiki.</b> (Flying Dragon). Large single vermillion flower with gold striped leaves	8.00
21.	Imachowkow. (Name of Ancient Saint). Sulphur yellow, round petals, flat shape. Lovely golden anthers. Well shaped rare flower	10.00
22.	Iwato Kagura. (Sacred dance of Iwato). Crimson with white splashes changing to deep crimson; double	8 00

		Each
23.	Kamada-Fuji. (Wisteria Blue). Large, beautiful, refined, double flowers of Wisteria blue. Profuse bloomer	20.00
24.	<b>Kasuga-Yama.</b> (Mt. Kasuga). A so called winter flowering variety. Supposed to bloom in November to January and again in spring. We believe it will bloom twice α year in the southern states. Brilliant pink;	
	semi double	9.00
25.	Kasumi Gaseki. (Name of Place). Clear pink; ball shaped with fringed tips at petals. Large bloom	8.00
26.	<b>Kimigayo.</b> (Reign of Emperor). White, with faint flesh tints; large; double; stout upright stems	8.00
27.	<b>Kokkoshi.</b> (King of black light). Brilliant reddish black, margined with faint white stripes; large, double flowers. One of best rare varieties	20.00
*28.	<b>Kokuhow.</b> (Black Phoenix). Large; double; luminous, clear blackish red; well-arranged petals	8.00
29.	Konronkoku. (The land of Konron). Pansy violet, shaded reddish black; enormous size, double flowers	8.00
30.	<b>Kumonα-Nishiki:</b> (Variegation of Hues of Clouds). Medium; semi-double; luminous blackish crimson with white stamens. Pinkish yellow variegated foliage	8.00
31.	<b>Kyokko</b> . (The light of sunrise). Crimson with large brownish stripes; beautiful double bloom	8.00
32.	Mikado Nishiki. (Brocade of Mikado). Brilliant scarlet crimson with white marginal cast; semi-double	8.00
33.	Mitama. (Beautiful Gem). Sparkling scarlet carmine; double and rare	8.00
34.	Miyako-no-Haru. (The spring of Metropolis). Clear pink with crimson variegations. Large double flower	8.00
35.	Miyo-no-hikari. (Light of the Era). Very large; semi-double; vermilion-salmon. Tall; profuse bloomer. Extra fine	10.00
36.	Miyuki-Nishiki. (Variegation of Imperial Procession). Large; double; reddish color margined with white	8.00
*37.	Moutan. Large; single; maroon-red. Free bloomer. First to flower	4.00
38.	Nira. (Oberlin, 1934). Very large; extremely double; light salmon-rose. A very fine variety and a good bloomer	8.00
39.	Nishiki-Jishi. (Variegation of Lion). Large; double; crimson with silver striping through the petals. Good bloomer. Excellent. Rare	10.00
40.	Ohbonsome. (Golden Hues). Large; double; pale cream with lilac tints at base. Rare flower	10.00
41.	Oh-Kwan. (Crown). Variegated red; early; semi-double	8.00

		Each
42.	Ohshokum. (Proper name of an Old Chinese beauty). Pink; lighter at the tips of petals; double	8.00
43.	Otome-no-Mai. (Dance of maidens). Deep scarlet crimson; ball shaped; double; large	8.00
44.	<b>Panama.</b> (Oberlin, 1920). Large; semi-double; brilliant salmon-rose, with central cushion of golden anthers. Profuse bloomer. Very erect and attractive	6.00
45.	<b>Rein-Kahu.</b> (Flight of Cranes). Large; double; fragrant; pure white, with central cushion of golden anthers. Profuse bloomer	8.00
46.	<b>Rimpo.</b> (Bird of Rimpow). Large, medium-double flowers of a reddish brown color	8.00
47.	Ruriban. (Ultramarine Light). Large; semi-double; satiny dark red. Extra fine. Good bloomer	6.00
48.	Sakura Gasane. (Piling of Cherry). Light pinkish pearl pink with soft tone. Large flower with strong stems	8.00
49.	Seidai. (Glorious Reign). Light flesh, shaded white, deep rose at base	8.00
50.	<b>Shikowden.</b> (Palace of violet light). Brilliant dark violet- purple, changing to lilac shaded deep rose; double	9.00
51.	Shin-Toyen. (New Fairyland). Large; double; rich fleshpink with crimson center	8.00
52.	Shiro-Kagura. (Oberlin, 1922). Large; semi-double; brilliant salmon-rose, with central cushion of golden anthers. Profus bloomer. Very erect and attractive. Light green foliage	7.00
*53.	Shishi-no-Tategami. (Lion's Mane). Large; semi-double; light salmon-pink. Tall and attractive	5.00
54.	<b>Shugyokuden.</b> (Palace of Gems). Large; well formed; double; charming bright scarlet-crimson without blue or magenta shade. One of the finest reds grown. Very rare	15.00
55.		10.00
56.	Tatioshishi. (Long Time Double). Extra-large, white, broad, crinkled petals, regularly formed, with a beautiful circle of golden stamens surrounding pistils, producing a unique effect. We consider this one of our best white Tree Peonies at present	15.00
57.	Tennyo-no-Hageromo. (Fairy's Wings). Light flesh with lilac shade. Large double cactus formed blooms	10.00
58.	<b>Tennyo-No-Mai.</b> (Dance of Fairy). Brilliant crimson; large flowers	8.00
59.	<b>Tokiwadzu.</b> (Name of Song). Beautiful lilac pink, broad waved petals. Large semi-double	8 00

		Each
60.	Tsuya-Sugata. (Coquettist Style). Light rose-pink, fringed	8.00
61.	and cut petals with a green margin on outer petals  Tsuzure Nishiki. (Variegation of Gobelin tapestry). Light	8.00
01.	red with scarlet variegation. Cactus flowering	10.00
62.	<b>Ubatama.</b> (Brilliant black king). Sating carmine shaded	
	black. Incurved petals. Distinct color amongst Tree Peonies. Very large; double flowers; outstanding	20.00
<b>*</b> 63.	Ukaregi-Ohi. (Golden Center). Large; semi-double; brill-	
	iant warm salmon-rose, with central cushion of golden anthers	5.00

	Yellow Lutea Hybrid	
123.	Alice Harding. (Lemoine, 1935). This striking novelty carries large full fragrant flowers of the purest yellow, exactly the color of Rose Souv. de Claudius Pernet. It was greatly admired by everyone that saw it, and especially by the well known plant lover after whom it was named. It produces the purest yellow bloom of any yet introduced	50.00
124.	Argosy. (Saunders, 1928). The flowers are fairly large, semi-double, clear bright sulphur-yellow, deep purplered at the base, and stand upright on stout stems. Very vigorous grower with handsome foliage. Fragrant	
125.		25.00
126.	Chromatella. (Lemoine, 1930). This is a sport from the beautiful variety Souv. de Maxime Cornu, it is similar in form and habit; but, the blooms are pure sulphur yellow, without any shade of salmon or buff. Large; double and very fragrant. We consider this variety the	
127.	best double yellow at present	25.00
	fragrant. A striking novelty	
129.	fully opened. Good grower and bloomer	
	wide, with 8 to 10 broad, round fringed and wavy petals, clear primrose-yellow with buff shade, blotched carmine at their base. It is very hardy and blooms profusely, on erect stems. Beautiful outstanding variety. Fragrant	35.00

	Each
130. <b>Mme. Louis Henry.</b> (L. Henry, 1919). These cup-shaped flowers are about 6 inches in breadth and are formed of 6 or more waved petals. The color is a mixture of carmine, buff and pink, shaded salmon and coppery yellow, with purple markings at the base of the petals. Fragrant	25.00
131. Satin Rouge. (Lemoine, 1926). Large full double flowers, averaging 8 inches in breadth, with broad petals of a satin appearance, and of a bright blood red, passing to an old red shade after some days. A distinctive different color in Tree Peonies; very fragrant	30.00
132. Souvenir de Maxime Cornu. (L. Henry, 1919). Very large (8 inches in diameter) and extremely double blooms; most fragrant of all peonies. Color, deep yellow heavily shaded orange-salmon. Distinct. A very vigorous variety becoming very tall and bushy. Profuse bloomer	15.00
Seven and eight year old specimens	25.00
133. <b>Surprise.</b> (Lemoine, 1920). Very large bloom with irregular petals of a mixture of straw-yellow, pale salmon, and rosy purple. It is tall and vigorous, and the very double, fragrant blooms are carried on strong stems	25.00
SEEDLINGS	
Unnamed. Fine strain of these various types. Must be sold as mixed and cannot be guaranteed as to color or type	4.00 8.00
Our plants usually have 5 or more well developed eyes with cient vigorous roots to insure the most rapid growth and develop which invariably produce blooms the first year. In no case are smaller than the standard 3 to 5 eye divisions.	ment,
Early May-Flowering Peonies SPECIES AND HYBRIDS

#### Chinenis Section (Double)

In order to assist the purchaser in making his selection easy, we have carefully classified Peonies as to color and season of bloom in a systematic manner in the following list.

The ratings of the American Peony Society are given, following the name of the introducer and time of introduction. The highest rating a Peony can attain is 10; this is considered perfection.

#### White Peonies

#### EARLY

11.	Grandiflora Nivea Plena. (Lemon, 1824). 8.1 Large globular rose type; milk-white; very fragrant. First white Peony to bloom\$	0.75
	Festiva Maxima. (Miellez, 1851). 9.3. The very largest milk-white bloom, flecked crimson. Magnificent	.50
13.	Mme. de Verneville. (Crousse, 1885). 7.9. Large, very full, bomb-type flower, with pure white center, blush when first open; fragrant. Medium height	.50
	Duchese de Nemours. (Calot, 1856). 8.1. Wonderful buds; cup-shaped, sulphur-white bloom	.50
15.	La Tendresse. (Crousse, 1896). 8.1. Large, compact, flat rose type; uniform milk-white, splashed guards, center flecked crimson. Strong; free bloomer	.50
	MIDSEASON	
16.	Mme. Crousse. (Calot, 1886). 7.9. Medium size; pure white, center flecked crimson; most fragrant. Strong stiff stem. Best all-around white	.50
	Mons. Dupont. (Calot, 1872). 8.3. Flat, milk-white blooms, splashed crimson. Erect, tall; free bloomer	.50
	Avalanche. (Crousse, 1886). 8.7. Very large, compact, pure white blooms, edged with a light line of carmine. Very strong; extremely free bloomer	.50
19.	James Kelway. (Kelway, 1900). 8.7. Large, rose-white bloom, showing golden stamens. Changes to milk-white. Tall vigorous: free bloomer	.50

		Each
	Mme. Emile Lemoine. (Lemoine, 1889). 8.9. Large, globular, compact, semi-rose type; milk-white	.50
21.	Le Cygne. (Lemoine, 1907). 9.9. Perfectly formed, milk- white, globe-shaped blooms with no markings or sta- mens; very fragrant. Erect; strong stems	2.00
22.	Jubilee. (Pleas, 1908). 8.9. Very large, double flowers with long, narrow, white petals having a greenish tinge. Tall; free flowering; long stems	1.00
23.	Mrs. Edward Harding. (Shaylor, 1918). 9.3. Blooms double, large, white, illumined by golden stamens under the petals. Free blooming; stiff stems	1.50
24.	John M. Good. (Welsh, 1921). 9.3. Double type; large; outer petals very large, graduating smaller; very pale pink, shading to pure white; richly fragrant. Tall, vigorous; moderately floriferous; stiff stems	1.50
25.	Frankie Curtis. (Vories, 1924). 9.3. Flower double, very large, delicate flesh-pink, changing to pure white; guards broad. Medium tall; floriferous; stiff stems	3.00
26.	Kelway's Glorious. (Kelway, 1909). 9.8. Double type; very large; white, crimson streaks on outside guard petals; strong rose fragrance. Medium height; free flowering; strong stems.	2.00

	JAPANESE PEONIES			
This is a type of Herbaceous Peony developed from the single type. In the process of development, the stamens and anthers have lost their character as such, and have become transformed into narrow, thick petaloids or into narrow petals tipped with vestiges of the yellow anthers without pollen, and are surrounded by five or more broad quard petals.				
wide som	They are strong growers, and many fine varieties, embrace e range of color, have been imported to this country from Jace seedlings of exceptional merit have also been produce erican growers. Grow under the same conditions as the so- mensis Peonies and require the same treatment.	apan; ed by		
141.	Ama-no-sode. (Japan). 9.2. One of the best "Japs."
